

**ONLY PEOPLE WHO USED FITBIT WRIST-WORN DEVICES (or Google Pixel watches)
FROM February 25 to April 30, 2025 CAN PARTICIPATE IN THIS STUDY.**

We are testing a platform designed to collect and analyze wearable data. In this pilot, we are interested in your past data from a specific time period: **February 25 to April 30, 2025.**

How it works:

- If you did not wear a Fitbit watch or band or Google Pixel watch between February 25 to April 30, 2025, please do not continue with the survey.
- Click the link at the bottom of this page to securely register your device.
- We will request access only to your data from February 25 to April 30, 2025. To be eligible, you must have used a wrist-worn device during that period.
- You will receive \$4 for sharing usable data that we can access in that time window.

Payment will be processed only if all of the following are true:

- You successfully connect your device using the link we provide.
- The connected device is a wrist-worn Fitbit device or Google Pixel. Just having the Fitbit app on your phone, a Fitbit account without a device, or using other brands and devices is not eligible.
- We can access data from that device for the period February 25–April 30, 2025 (for example, steps, heart rate, or related activity data. No profile data will be collected).
- If we cannot establish a valid connection or if there is no wrist-worn data for that period, we will not be able to issue the data-related payment.

Privacy & data protection:

- Your privacy is our top priority. All data collected is fully anonymized and cannot be linked back to you personally.
- In the device registration wizard, we'll guide you to opt out of sharing your profile information, so we only receive the minimum data needed for this study.
- HIPAA compliance: Our platform complies with the Health Insurance Portability and Accountability Act (HIPAA), which means we follow strict regulations to protect the confidentiality, integrity, and security of your health data.
- This is a **short-term, retrospective data collection**. Your Fitbit account remains under your control, and you can disconnect at any time.
